About

I'm 3rd-year Information Technology Engineering student specializing in Machine Learning, Computer Vision, and Web Development. Proven experience building end-to-end AI and full-stack applications, from model training to production-ready web interfaces. Thrive in hackathons and fast-paced environments, delivering practical, real-world solutions.

Education

Xavier Institute of Engineering
Bachelor of Engineering in Information Technology

Aug 2023 – Present
Current GPA: 9.75

Nirmala Memorial College
Higher Secondary Certificate (12th) - Science (PCM)

Aug 2021 – Feb 2023
Percentage: 76%

Projects

GovTracker -Government Scheme Management System | *Java, MySQL, NetBeans*

- Developed a government scheme management system for farmers with registration, scheme discovery, and eligibility tracking.

Fluencify -Language Learning Assistant | *Django, MySQL, HTML/CSS, Next.JS*

- Developed a web-based language learning assistant with user authentication and personalized learning flows.
- Implemented structured content delivery using Django REST APIs and a responsive Next.js frontend.

StartX -Your Carrer's Starterpack | *React.JS, Express.JS, Supabase, Node.JS*

- Building a career-focused platform to showcase skills and projects.
- Developing a full-stack solution using React, Node, and Supabase.

Jal Nivikaran | *ReactNative-EXPO, Supabase*

- Developing a mobile application to visualize groundwater level data and trends from DWLR stations.
- Implementing interactive maps and real-time data handling using React Native (Expo) and Supabase.

Technical Skills

Languages: Python, Java, JavaScript, HTML, CSS, SQL, C++

Frameworks: Django, Bootstrap, NEXT.JS

Tools: MySQL, NetBeans, Git, AWS, Jenkins, N8N

Achievements

Mongo DB Certification 2024

Oracle Cloud Infrastructure AI Foundations Associate certification for 2025

Cyber Job Simulation in collaboration with Deloitte

Top 3 in class for Python Mini Project in SEM IV.
