asmit01052005@gmail.com | 9321166216 | LinkedIn | GitHub

Summary

3rd-year Information Technology Engineering student specializing in Machine Learning, Computer Vision, and Full-Stack Web Development. Experienced in building end-to-end applications, from backend systems and data handling to production-ready web and mobile interfaces. Strong problem-solver with hands-on experience in hackathons, certifications, and technical leadership roles.

Education

Xavier Institute of Engineering
Bachelor of Engineering in Information Technology

Aug 2023 – Present
GPA: 9.75

Nirmala Memorial College
Higher Secondary Certificate (12th) – Science (PCM)

Aug 2021 – Feb 2023
Percentage: 76%

Projects

GovTracker – Government Scheme Management System | *Java, MySQL, NetBeans*

- Developed a government scheme management system for farmers featuring user registration, scheme discovery, and eligibility tracking.

Fluencify – Language Learning Assistant | *Django, MySQL, HTML/CSS, Next.js*

- Built a web-based language learning platform with secure authentication and personalized learning workflows.
- Implemented RESTful APIs using Django and a responsive frontend using Next.js.

StartX – Career Starter Platform | *React.js, Node.js, Express.js, Supabase*

- Developing a career-focused platform for showcasing skills, projects, and professional profiles.
- Building a scalable full-stack solution using React, Node.js, and Supabase.

Jal Nivikaran | *React Native (Expo), Supabase*

- Developing a mobile application to visualize groundwater level data and historical trends from DWLR stations.
- Implementing interactive maps and real-time data synchronization using Supabase.

Multi-Cloud Storage Manager | *Flutter, AWS S3, Google Cloud Storage, Firebase*

- Designing a unified cloud storage application enabling file upload, browsing, and management across multiple cloud providers.
- Implementing secure authentication, provider selection, and real-time file synchronization using user-managed API keys.

Experience

Vice Chairperson | *IEEE Student Council, XIE*

Jan 2026 – Present

- Co-led IEEE student council initiatives, organizing technical events, workshops, and student engagement activities.
- Coordinated with the chairperson, faculty, and core team to plan and execute council programs.
- Contributed to event management, communication, and inter-department coordination.

Technical Skills

Languages: Python, Java, JavaScript, C++, SQL, HTML, CSS

Frameworks: Django, React.js, Next.js, Flutter, Bootstrap

Tools & Platforms: MySQL, Supabase, Git, AWS, Firebase, Jenkins, n8n

Achievements

Earned MongoDB Developer Certification (2024).

Ranked among the Top 3 students for the Python Mini Project (Semester IV).

Secured 5th position in SprintNova'25 at XIE.

Completed Cyber Job Simulation in collaboration with Deloitte (2025).

Achieved Oracle Cloud Infrastructure AI Foundations Associate Certification (2025).

Secured 3rd position in CodeSprint'26 at XIE.
